SUSTAINABILITY IN EDUCATION : BRINGING PEDAGOGICAL & SCIENTIFIC PERSPECTIVES TO CISV EDUCATIONAL GOALS

Where and When	 <i>Conservation & Environment</i>	 <i>Awareness raising & Education</i>
Helsinki, Finland. July 2020		
Educational Content Area		
Sustainable Development		
Project Description		
<p>Participants in this IPP will explore ways to teach children and youth about our climate, our planet, and how sustainability affects them.</p> <p>The IPP will work with a collection of organizations who work with evidence, experiment and phenomenon-based learning, to bring climate education into schools in Finland. Using guest speakers, workshops, and educational visits from scientists and educators, participants will consider different approaches that can be used to integrate more science and fact-based ideas into CISV activities. They will aim to breathe new life into familiar CISV content and redefine the way we think about our educational goals.</p> <p>During the IPP, participants will be encouraged to reflect on the sustainability of CISV as an organization and as an educator, and what they think that should look like going forward.</p>		
Participant Profile		
<p>Participants should ideally:</p> <ul style="list-style-type: none">✓ have an interest in science and pedagogy✓ have an interest or experience in science-based teaching✓ have a passion for developing CISV Educational Principles✓ be willing to prepare an activity sharing a perspective or example of the theme from their own country or community.
